Main Features:
- Frequency Range: 0.02 to 6 GHz.
- Typical values: Gain 27 dB, NF 5.5 dB
- RF connectors (I/O): SMA Female
- Solder filtered pins for DC connection
- Several mounting options
- Gold platted compact aluminum housing
- Hi-reliability and dedicated screening/environmental tests available under request

ERZ-LNA-0002-0600-27-5.5

The ERZ-LNA-0002-0600-27-5.5 is a Low Noise Amplifier providing a gain of 27 dB with a noise figure of 5.5 dB. The compact size and modularity makes it ideal for a wide range of applications.

Typical applications:
- Industrial / Laboratory
- Satcom / Telecom
- Space / Aerospace / Military

- Stress above these ratings may cause permanent damage to the device.
- It is final user responsibility to maintain the amplifier within the specified ranges.

**Measurements Conditions**

All measurements provided in this report were performed at the following conditions:

<table>

</tr>
</tbody>
</table>

**Environmental Specifications (By Design)**

- Operating Temperature: -54 to +85 ºC (MIL-STD-810F, method 520.2)
- Storage Temperature: -55 to 125 ºC (MIL-STD-810F, method 520.2)
- Vibration: 8g rms (MIL-STD-810F, method 514.5)
- Shock: 20g, 11ms, saw-tooth (MIL-STD-810F, method 516.5)
- Acceleration: 15g (MIL-STD-810F, method 513.5)

**RoHS & REACH Compliance**

This part is compliant with EU 2011/65/UE RoHS (Restrictions on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment) and REACH (Registration, Evaluation, Authorization and restriction of Chemical substances) directives.
Mechanics and Housing
Documentation and Test Reports

All modules are at least delivered with: Electrical Test Report, Certificate of Conformance, Certificate of Acceptance and Origin. Optionally, units can be environmentally tested (temperature, vibration...).

Option (HS): Heat Sink

A heat sink (HS) can be provided to allow the operation of Power Amplifiers. Please note that most power amplifiers need heat sink or appropriate heat dissipation strategy.

Space / Military Usage

Most of ERZIA’s products are based on rad-hard technologies and can be manufactured and integrated according to MIL / ECSS or specific hi-rel standard-screening for space, aeronautics, military or specific hi-reliability usage.

Customization and Extended Performances

ERZIA can fully design or adapt one of the existing RF amplifiers designs according to your specifications. Please contact us for additional information.
