**ERZ-LNA-0200-1800-17-4**

The ERZ-LNA-0200-1800-17-4 is a Low Noise Amplifier providing a gain of 16 dB with a noise figure of 4 dB. The compact size and modularity makes it ideal for a wide range of applications.

**Main Features:**
- Frequency Range: 2 to 18 GHz.
- Typical values: Gain 16 dB, NF 4 dB
- RF connectors (I/O): SMA mm Female
- Solder filtered pins for DC connection
- Several mounting options
- Grey painted compact aluminum housing
- Hi-reliability and dedicated screening/environmental tests available under request

**Typical applications:**
- Industrial / Laboratory
- Satcom / Telecom
- Space / Aerospace

</table>

- Stress above these ratings may cause permanent damage to the device.
- It is final user responsibility to maintain the amplifier within the specified ranges.

Measurements Conditions

All measurements provided in this report were performed at the following conditions:

<table>

Environmental Specifications (By Design)

Operating Temperature: -45 to +85 ºC
Storage Temperature: -55 to 125 ºC
Vibration: 8g rms
Shock: 20g, 11ms, saw-tooth
Acceleration: 15g

RoHS & REACH Compliance

This part is compliant with EU 2011/65/UE RoHS (Restrictions on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment) and REACH (Registration, Evaluation, Authorization and restriction of Chemical substances) directives.
Documentation and Test Reports

All modules are at least delivered with: Electrical Test Report, Certificate of Conformance, Certificate of Acceptance and Origin. Optionally, units can be environmentally tested (temperature, vibration...).

Option (HS): Heat Sink

A heat sink (HS) can be provided to allow the operation of Power Amplifiers. Please note that most power amplifiers need heat sink or appropriate heat dissipation strategy.

Customization and Extended Performances

ERZIA can fully design or adapt one of the existing RF amplifiers designs according to your specifications. Please contact us for additional information.
